

For Tenant connections:

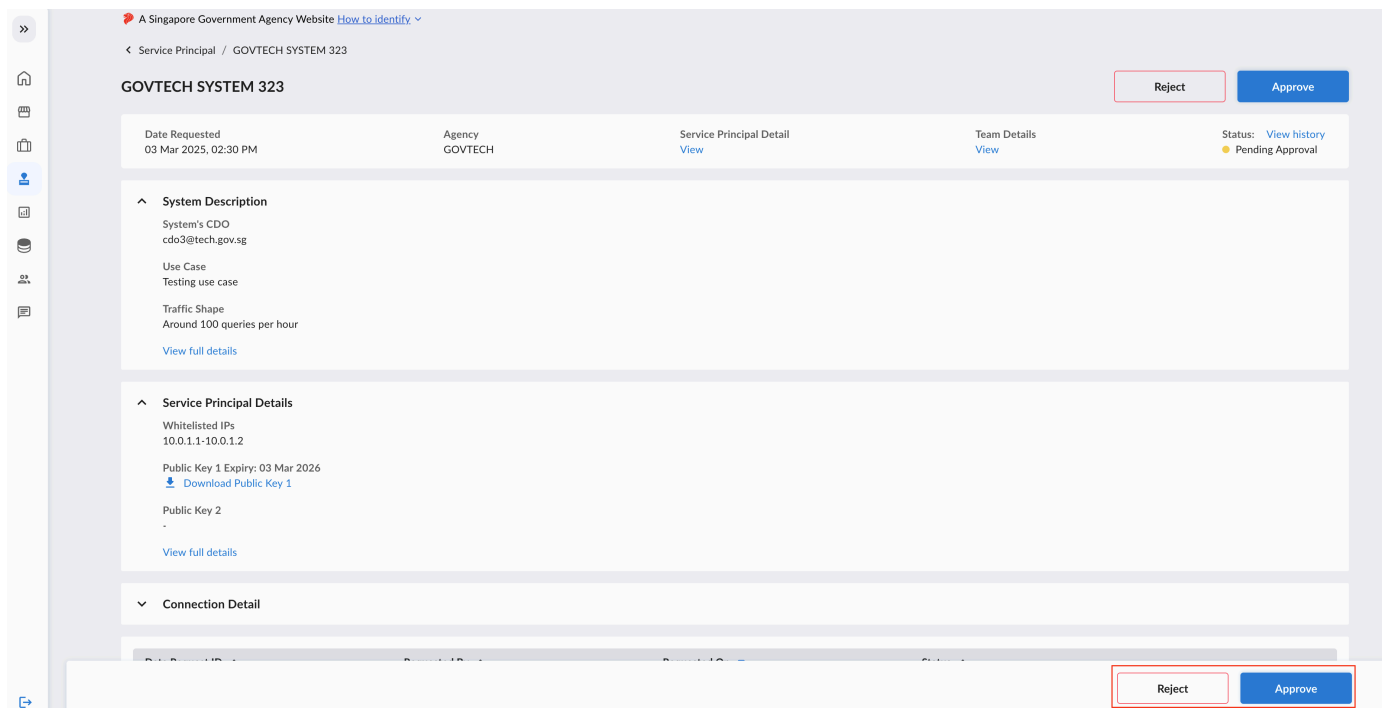

Service Principal Account Approval

! INFO

User Role Required: **Platform Admin**

When the service principal account request is submitted, the request will be in the "Pending Approval" state. The platform admin has to review the request.

Connection Approval

After approval of the service principal account, the connections will be subjected to approval by the relevant owners.

Data Request Connection Approval

! INFO

User Role Required: **Data Request Owner**

Data Request Owner is required to verify and authorize the system connection to access the data in their fulfilled Data Request

To view the list of pending system connections, go to the "Requests" page and select the "System Connection" tab, then select the "Made by others" tab.

Dataset Assignments

! INFO

User Role Required: **Tenant Admin**

This step is only applicable to Tenant connections

Tenant Admin must assign specific datasets that the approved system connection is allowed to upload to

After the connection is approved by the Tenant Manager, the Tenant Admin must assign datasets to the system connection to enable uploads.

To do this, go to the "Requests" page and select the "System Connection" tab, then select the "Made by others" tab.
