

Creating Tenants

! INFO

Only **Platform Admins, CDO, CDO Team Managers, CDO Team Members** can create Tenants.

Creating a Tenant on DataHive involves the set up of a dedicated space for CDO / CDO Team Managers / CDO Team Members to manage specific user roles required for the [Dataset Management feature](#).

Please refer to the section on [user roles](#) to better understand how various roles are utilized within DataHive.

To create a new tenant, start by clicking on the "Users" tab. Subsequently click on "All Tenants" and "Create Tenant".

The screenshot shows the DataHive interface. On the left is a sidebar with a menu: Home, Marketplace, Resources, Approval, Visualisation, Datasets, **Users** (highlighted with a red box), and Requests. The main content area has a header with 'A Singapore Government Agency Website' and a 'How to identify' link. Below this is a tab bar with 'All Users', **All Tenants** (highlighted with a red box), 'Source Agency', and 'CDO Team'. A search bar is present. On the right, there is a 'Create tenant' button (highlighted with a red box). Below the search bar is a table with the following data:

Tenant name ▾	Assigned CDO ▾	Number of members ▾	System connection ▾
Trusted Center for Sensor Data	koh_jun_wei@tech.gov.sg	18	✓
Demo Tenant	koh_jun_wei@tech.gov.sg	2	
Trusted Center - Individual and Business	koh_jun_wei@tech.gov.sg	23	✓
Mock Tenant 1	daniel_wz_lim@tech.gov.sg	4	

You will be redirected to a form as shown below. Only select "Yes" to the system connection question in the red box below if your tenant has a pre-existing arrangement with the DataHive platform.

Once the tenant has been successfully created, the assigned Tenant Manager(s) may begin [managing tenant users](#) and/or [onboarding datasets to the tenant](#).

 TIP

If you are looking to onboard a tenant with a system connection to the Standard Data Platform (SDP), refer to the [Onboarding an SDP-Connected Tenant](#) guide.
