

DataHive User and SSOT

DataHive Users and SSOTs can effectively navigate the DSD using the provided filters.

The following examples illustrate the usage of [Filters](#).

Let's run through an example use case.

You are a subscriber of dataset 'Bus Location', and have requested for the data from 1 July 2024 to 27 July 2024.

Dataset / Agency Selection

To see all data issues that exists for your dataset of interest, simply select 'Bus Location' in the Dataset filter.

Alternatively, you can choose an agency of interest, for example: LTA.

Here is an example illustrating the application of both filters.

Dataset	Agency
Bus Locations ▾	LTA ▾

INFO

The filters are Autocomplete fields, so you can type into the filter field to search for the particular value you are looking for, instead of having to scroll through the entire list

As seen in the example below: typing 'Bu' will trim the available options down to 'Bus Locations'.

Dataset

Bu|

Bus Locations

Affected Data Date Range

To identify the issues which may affect you, you can use the `Affected Data Date Range` filter as such:

Affected data date range ⓘ

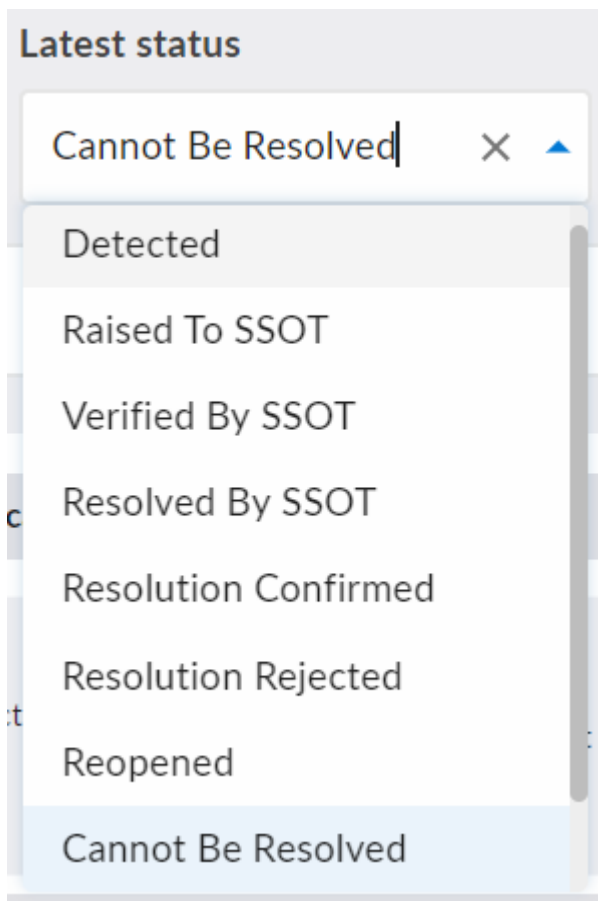

01/07/2024 ✕

-

27/07/2024 ✕

Latest Status

If you are only interested in the outstanding data issues that could not be resolved, you can use the `Latest Status` filter as such:

After applying all the above filters, here is an example of the result, showing all the data issues that matches your needs.

Dataset	Agency	Latest status	Affected data date range ⓘ		Issue raised date range ⓘ	
Bus Locations	LTA	Cannot Be Resolved	01/07/2024 ✕	27/07/2024 ✕	Start date 📅	End date 📅
Search 🔍						
Status ID / Dataset	Agency	Latest status	Status category	Status summary	Affected data	Issue raised date
D7-0015 Bus Locations	LTA	Cannot Be Resolved	Incorrect Data Format	Invalid datetime format	Date: 25 Jul 2024 - 26 Jul 2024 Daily Affected Proportion: 100%	26 Jul 2024 No. of days since raised: 2

1 to 1 of 1 rows

< 1 >

Rows per page: 10

Free Text Search

You can also use free text search to filter for data issues based on keywords. As seen in the example below, the appropriate matching values will be highlighted in the table.

resolve

Status ID / Dataset	Agency	Latest status	Status category	Status summary	Affected data	Issue raised date
D7-0015 Bus Locations	LTA	Cannot Be Resolved	Incorrect Data Format	Invalid datetime format	Date: 25 Jul 2024 - 26 Jul 2024 Daily Affected Proportion: 100%	26 Jul 2024 No. of days since raised: 2
Sub Status	Date & Time		Additional Details			
Detected	26 Jul 2024, 11:42 AM		Issue spotted by validation process			
Raised To SSOT	26 Jul 2024, 11:58 AM		Issue raised to SSOT			
Verified By SSOT	26 Jul 2024, 03:12 PM		Issue acknowledged by SSOT			
Cannot Be Resolved	28 Jul 2024, 09:10 PM		Issue cannot be resolved for the affected dates. Other dates are unaffected.			

! INFO

Do note that the search term works for partial matches as well, i.e. 'res' would match 'resolved' as well.

Affected Data

For each data issue, you can find information concerning the **Date(s)** for which the dataset is affected.

You can also find **Daily Affected Proportion**, which tells you the average percentage of the dataset that is affected across those dates.

i NOTE

Note that **Daily Affected Proportion** is an average and is mainly documented for data quality metrics. For detailed breakdown of how the dataset is affected across several dates, you can refer to additional details provided in the **Sub Status** updates.

Affected data

Date: 25 Jul 2024 - 26 Jul 2024

Daily Affected Proportion:
100%

Issue Raised Date Range

For SSOTs, you might be interested in the data issues for your dataset in a particular time period.

To find out the relevant data issues raised to you from 20 July 2024 to 27 July 2024, you can use the following `Issued Raised Date Range` filter:

Issue raised date range 

20/07/2024

-

27/07/2024
