

Deleting Tenant Users

! INFO

Only **Platform Admins, CDO, CDO Team Managers and CDO Team Members** can delete tenants. Only **Platform Admins** can view deleted tenants.

To delete tenant, start by clicking on the "Users" tab. Subsequently click on "All Tenants" and navigate to the specific tenant's row and click the ellipsis on the right.

The screenshot shows the Tenant Management interface. On the left, a sidebar contains navigation links: Home, Marketplace, Resources, Approval, Visualisation, Datasets, **Users** (highlighted with a red box), and Requests. The main content area has three tabs: All Users, **All Tenants** (highlighted with a red box), and CDO Teams. Below the tabs is a search bar and a 'Create tenant' button. A table lists tenants with columns: Tenant name, Assigned CDO, Number of members, Number of datasets, and System connection. The table contains three rows: 'Trusted Center for Sensor Data', 'Demo Tenant', and 'Trusted Center - Individual and Business'. A context menu is open for the 'Demo Tenant' row, showing 'Edit tenant details' and 'Delete' (highlighted with a red box).

Tenant name	Assigned CDO	Number of members	Number of datasets	System connection
Trusted Center for Sensor Data	jason_ang@tech.gov.sg	21	38	✓
Demo Tenant	jason_ang@tech.gov.sg	4	143	✓
Trusted Center - Individual and Business	jason_ang@tech.gov.sg	31	137	✓

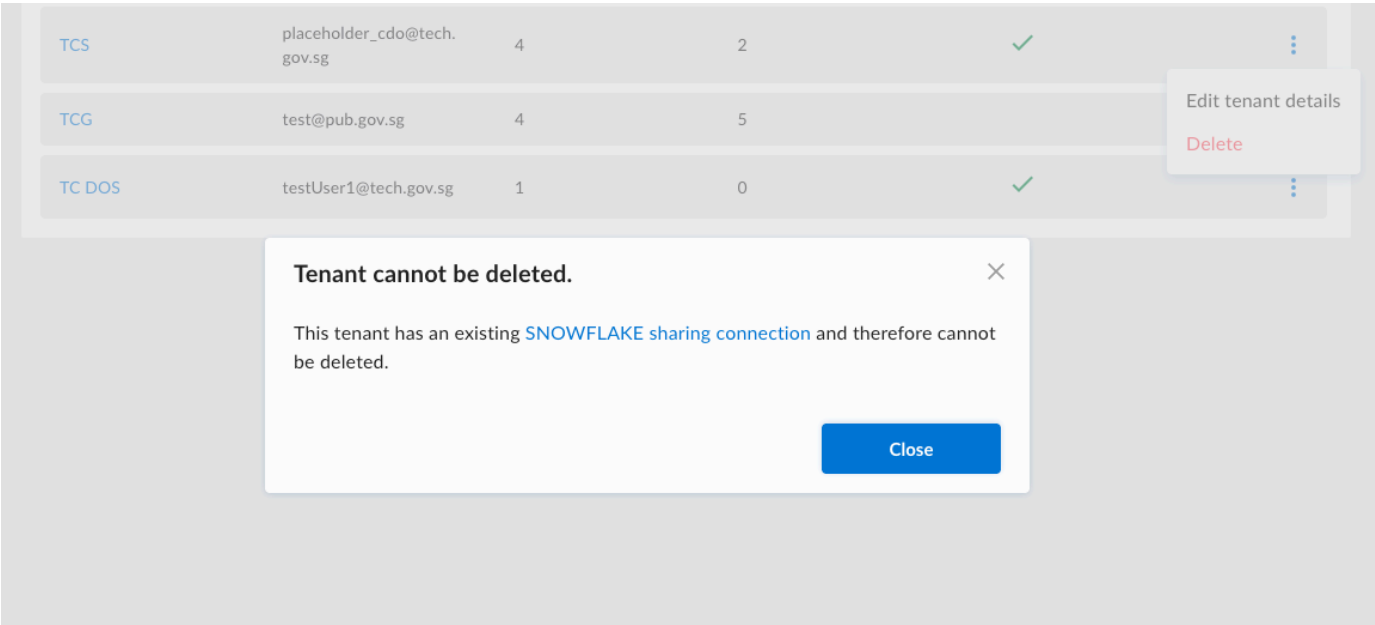

Then, click the "Delete" button.

The main content area has three tabs: All Users, **All Tenants** (highlighted with a red box), and CDO Teams. Below the tabs is a search bar and a 'Create tenant' button. A table lists tenants with columns: Tenant name, Assigned CDO, Number of members, Number of datasets, and System connection. The table contains four rows: 'Test Tenant Creation', 'test', 'Tenant To Delete', and 'Trusted Center - Individual and Business'. A context menu is open for the 'Tenant To Delete' row, showing 'Edit tenant details' and 'Delete' (highlighted with a red box).

Tenant name	Assigned CDO	Number of members	Number of datasets	System connection
Test Tenant Creation	koh_jun_wei@tech.gov.sg	1	0	✓
test	kevin_kw_lim@tech.gov.sg	2	0	✓
Tenant To Delete	jason_ang@tech.gov.sg	1	0	✓
Trusted Center - Individual and Business	pang_jun_jie@tech.gov.sg	10	1	✓

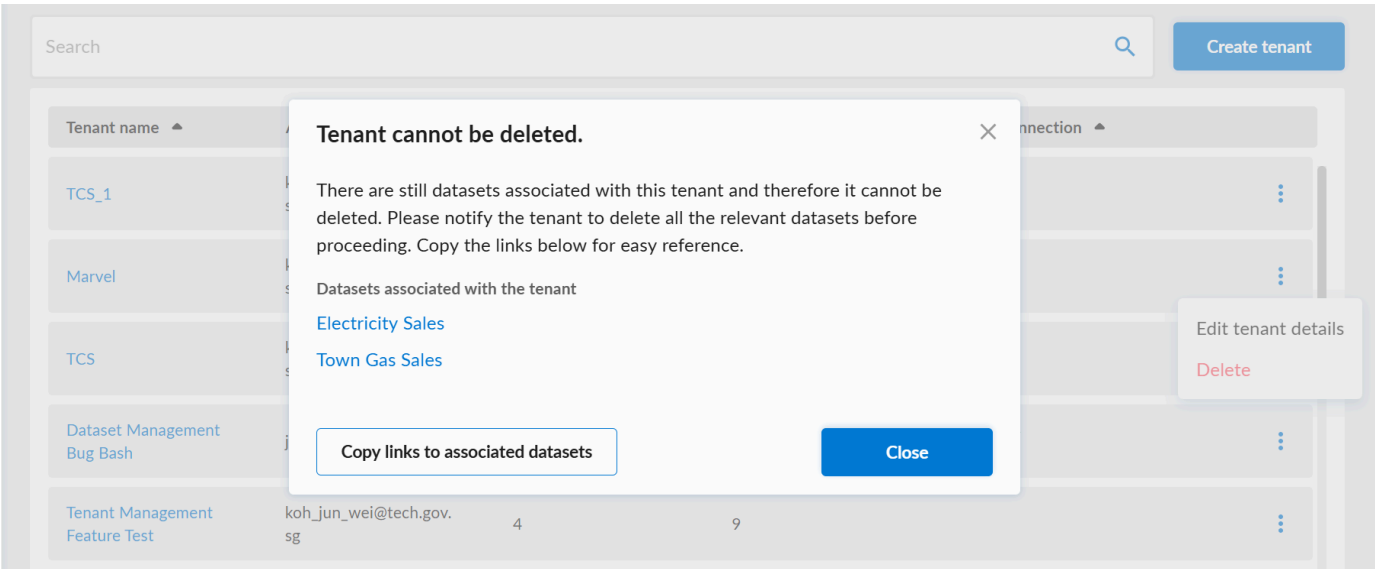

Deleting a Tenant with a Snowflake Secure Data Sharing connection

If your tenant has an existing [Snowflake Secure Data Sharing](#) system connection, you will not be able to delete the tenant. Contact the platform admin for further steps on how to delete the tenant.

Deleting a Tenant with datasets

If your tenant has datasets associated with it, you will not be able to delete the tenant. You will need to [delete](#) all the datasets associated with the tenant before you can delete the tenant. Copy the links to those datasets, which you can use to contact your tenant admin or managers to delete the datasets.

Deleting a Tenant with no datasets and no Snowflake Secure Data Sharing connection

You will then see a dialog box to confirm the deletion of the tenant. To delete the tenant, click on the checkbox and then click on the "Delete" button.
