To understand when and how to use these filters, please refer to the following descriptions and usage guidelines:

Filter	Description	Usage Guideline
Dataset	Filter for issues for a specific dataset	Autocomplete Field: Only one value can be selected All selected when not specified.
Agency	Filter for issues for datasets from a specific agency	Autocomplete Field: Only one value can be selected All selected when not specified.

Filter	Description	Usage Guideline
Latest Status	Filter for issues where the latest Sub Status is a specific value. This is useful when, for example, you are looking to find outstanding issues that are unresolved. Refer to Sub Status Type for more details.	Autocomplete Field: Only one value can be selected All selected when not specified.
Affected data date range	Filters for issues where the affected data overlaps with this filtered range. Refer here for usage examples.	Start and End Dates are both optional. If not specified, Start Date will be assumed to be the earliest date possible, and End Date will be assumed to be the current date. All data issues which overlap will be filtered.
Issue raised date range	Filters for issues where the date the issue was raised is within this filtered range. Refer here for usage examples.	Start and End Dates are both optional. All data issues with raised dates within the range will be filtered.
Free Text Search	Filters for issues which contain details that match the searched word	Can be used to search for specific issues based on keywords, or even the status ID.
