

Maintenance Window

DataHive undergoes regular scheduled maintenance to ensure platform reliability and performance. During these windows, some services may experience intermittent disruptions.

INFO

Note This schedule applies to regular maintenance only and does not apply to hotfixes.

Schedule

Environment	Day	Time	Duration
Staging	Every Monday	18:00 SGT	~10 minutes
Production	Every Thursday	18:00 SGT	~10 minutes

Services Affected

The following services may experience intermittent disruptions during the maintenance window:

- DataHive Portal
- Asynchronous Query Jobs
- Standard Synchronous Query Jobs

WHAT TO DO

Please retry any failed requests after a few minutes.

Services Unaffected

The following services will remain available during the maintenance window:

- Snowflake System Connections
- Enhanced Synchronous Query Jobs
- DataHive's Databricks

 INFO

For maintenance that may affect these services, an email notification will be sent at least 2 weeks prior.
