

Manage Access to Data Request

As a data request owner, you can:

- Add / Remove team members
- Change data request owner

More information can be found [here](#).

Approve / Reject Team Access Changes

The internal approver will need to approve/reject "Team Access Requests" submitted by data request owners. To do so, go to the approval page, click into the respective data request, and click on the **Team access** tab.

The screenshot shows the 'Manage Access to Data Request' interface. At the top, there's a breadcrumb trail: < Data requests / GOVTECH-2025-04-007. Below this, a summary bar displays key information: Date requested: 03 Apr 2025, 12:01 PM; Owner: jason_ang@tech.gov.sg; Team details: View; Data request details: View; Expiry date: 03 May 2025; Status: View history (Team Access Changes). Below the summary bar, there are tabs: Datasets requested, Concierges, Team access (highlighted with a red box and a blue '1' badge), and Others. The 'Team access' tab shows a table with the following data:

ID	Date requested	Requestor	Approval status
> GOVTECH-2025-04-007--TAR-1	08 Apr 2025, 11:17 AM	jason_ang@tech.gov.sg	● Pending Approval

At the bottom of the table, there are two buttons: a red 'X' (Reject) and a green checkmark (Approve), both highlighted with a red box. The bottom of the interface shows '1 to 1 of 1 rows', a pagination control with '1', and 'Rows per page: 10'.

Once approved, the following users will receive notification emails:

- If data request owner is changed, the new and previous owner will be notified
- If there are addition of team members, the newly added members will be notified

Edit Team Access as Internal Approver

Internal Approvers can edit team access for data requests, including changing the Data Request Owner.

This feature is only available to internal approvers with unexpired data requests that:

- Are at the "Request Fulfilled" stage; and
- Have no pending Team Access Requests

 CAUTION

Internal approvers should only resort to using this feature in the event that data request owners are not able to edit the team (e.g. when data request owners are no longer valid). Otherwise, please get the data request owner to edit the team according to the *View, Add or Remove Team Members* section [here](#).

To do so, go to the approval page and navigate to a data request's approval page. Under **Team details**, click on **View** to bring up the edit team dialog.
