Adding more system connections

You can only add additional connections of the same type to an existing Service Principal Account. If you require a different connection type, please request for a new Service Principal Account.

Data Request Connections

To add more data request connections to the account, key in the fulfilled data request ID in the textbox.

Service Principal Details

Data Request Connections

Tenant Connections

Fulfilled Data request IDs

The fulfilled Data Request IDs (e.g. GOVTECH-2025-01-002) to be associated with the service principal.
Note: Production data requests are not mirrored in DataHive's staging environment. Create a separate staging data request in [stg.datahive.gov.sg](#) if you require a staging set up.

Input the fulfilled data request IDs separated by a comma

Existing data requests

Data Request ID	Requested By	Requested On	Status
GOVTECH-2025-06-048	yi_ji_yap_from.tp@tech.gov.sg	10:16 AM 16 Jul 2025	Connected

After submission, the data request owners will be notified to review and approve these system connections.

Tenant Connections

To add more tenant connections to the account, select the tenant name from the dropdown.

Service Principal Details

Data Request Connections

Tenant Connections

Tenants

Select the tenants which the service principal account will be connected to. Once connected, you can use the account to automate the dataset uploading process.

Select tenant(s)

Existing tenant connections

Tenant Name	Requested By	Requested On	Status
▼ TCS	yi_ji_yap_from.tp@tech.gov.sg	05:02 PM 11 Jul 2025	Connected

After submission, the Tenant Manager will be notified to review and approve these system connections.

Change IP Address

You can change the IP address that is being whitelisted for your service principal account.

You may enter an individual address (e.g. `10.0.0.1`), a range of addresses (e.g. `10.0.0.0-10.0.0.255`), or a CIDR block (e.g. `10.0.0.0/24`).

Please note the restrictions on the number and origin of the IP addresses:

- Intranet IPs should not exceed 256 IPs and should be in the 10.x.x.x format. Only 10.x.x.x IPs are GEN routable.
- Internet IPs should not exceed 32 IPs and should be of Singapore origin.

IPv4 address / address range for firewall whitelisting ⓘ

Intranet IPs should not exceed 256 IPs and should be in GEN-routable 10.x.x.x format

Internet IPs should not exceed 32 IPs and should be of Singapore origin

10.0.1.1-10.0.1.2 ✕

10.1.0.0/16 ✕

10.2.0.0 ✕

IP address, IP address range, or CIDR (e.g. 10.0.0.0 / 10.0.0.0-10.1.1.1 / 10.0.0.0/24)

Key Rotation

⚠

WARNING

The key will expire after 1 year from the time of creation.

To view the expiry date of the key, go to the service principal detail page and expand the "Service Principal Details" section:
