

Managing Tenant Users

! INFO

Only **Tenant Managers** can manage users in a Tenant.

Adding Users

! INFO

You may assign multiple Tenant Managers and Tenant Admins as needed. Please note that a single user cannot hold both roles simultaneously.

Click on the tenant that you want to add the user into.

The screenshot displays the 'All Tenants' page. On the left is a sidebar with navigation links: Home, Marketplace, Resources, Approval, Visualisation, Datasets, Users (highlighted), and Requests. The main content area has tabs for 'All Users', 'CDO Team', and 'All Tenants'. Below the tabs is a search bar and a table. The table has the following data:

Tenant name	Assigned CDO	Number of members	System connection
TCS	cdo@tech.gov.sg	5	

You will be redirected to the tenant page. Then click on the "+ Add Member" button on the top right of the users page.
