

Onboarding an SDP-Connected Tenant

INFO

User Role Required: CDO / CDO Team Manager / CDO Team Member

This guide:

1. Is for Agencies which have onboarded [Standard Data Platform \(SDP\)](#).
2. Walks you through creating a tenant with a SDP system connection on DataHive.

Overview

An SDP-connected tenant is created when the tenant requires a system connection with SDP. Unlike a standard tenant, dataset management for an SDP-connected tenant is handled through SDP rather than directly within DataHive.

TIP

If you are looking to create a standard tenant instead, refer to the [Creating Tenants](#) guide.

Creating the SDP-Connected Tenant

1. To create a new SDP-connected tenant, start by selecting "Users" from the sidebar to navigate to the "Users" page.
2. Click on the "All Tenants" tab.
3. You can then click on the "Create Tenant" button.

Source Agency CDO Teams **All Tenants**

Search Q **Create tenant**

Tenant name ▲	Assigned CDO ▲	Number of members ▲	Number of datasets ▲	System connection ▲
TCS_1	koh_jun_wei@tech.gov.sg	11	28	
Marvel	koh_jun_wei@tech.gov.sg	2	2	
TCS	koh_jun_wei@tech.gov.sg	20	39	✓
Dataset Management Bug Bash	jason_ang@tech.gov.sg	8	13	✓
Tenant Management Feature Test	koh_jun_wei@tech.gov.sg	4	9	
Test Tenant Creation	koh_jun_wei@tech.gov.sg	1	0	✓
test	kevin_kw_lim@tech.gov.sg	2	0	✓
test 33	koh_jun_wei@tech.gov.sg	3	9	
dataset upload tenant 1	daniel_wz_lim@tech.gov.sg	9	32	
Trusted Center - Individual and Business	pang_jun_jie@tech.gov.sg	10	1	✓

4. You will be redirected to a form as shown below. Fill up the tenant info accordingly.

5. When prompted "Do you require a system connection with Standard Data Platform (SDP)?", select **Yes**.

Dataset Management Restrictions

⚠ WARNING

Since dataset management for SDP-connected tenants is handled by SDP, the following actions are disabled within DataHive:

- Onboarding new datasets to an SDP-connected tenant
- Editing / publishing / unpublishing / deleting existing datasets in an SDP-connected tenant

If you attempt to perform these actions, you will see a disabled button or menu item with a tooltip indicating that dataset management is not available for SDP-connected tenants.
