

Restore Dataset

! INFO

Only **Tenant Managers** can restore deleted datasets.

In case the dataset was deleted by accident, it is possible to restore it within 90 days of deletion.

To restore a dataset, click on the "Deleted datasets" tab and click on the ellipsis icon associated with the dataset and then click "Restore dataset".

The screenshot shows the 'Dataset Management' interface. At the top, there are three tabs: 'All datasets', 'Onboarded by you', and 'Assigned to you'. A red box highlights the 'Deleted datasets' tab. Below the tabs is a table with the following columns: 'Dataset', 'Tenant', 'Dataset Admin(s)', 'Deleted Date', and 'Days Till Purged'. The table contains one row with the following data: 'dataset-test-date-col', 'dataset-mgmt-v2-test', '03 Jun 2025, 05:09 PM', and '89 days left'. A red box highlights the ellipsis icon at the end of the row. A dropdown menu is open, showing two options: 'Restore dataset' (highlighted with a red box) and 'Manage tenant admins'. At the bottom left, it says '1 to 1 of 1 rows'.

Dataset	Tenant	Dataset Admin(s)	Deleted Date	Days Till Purged
dataset-test-date-col	dataset-mgmt-v2-test		03 Jun 2025, 05:09 PM	89 days left

After the dataset is restored, the dataset will be recovered to "Un-published" status.

Please be reminded that only the data and metadata of the dataset can be restored, which means:

1. The revoked access in data requests cannot be restored.
2. The affected data product (if any) will remain undiscoverable.
3. Previous changelogs and data statuses will remain deleted.
