

For Data Requestors

[Submit a Data Request](#)

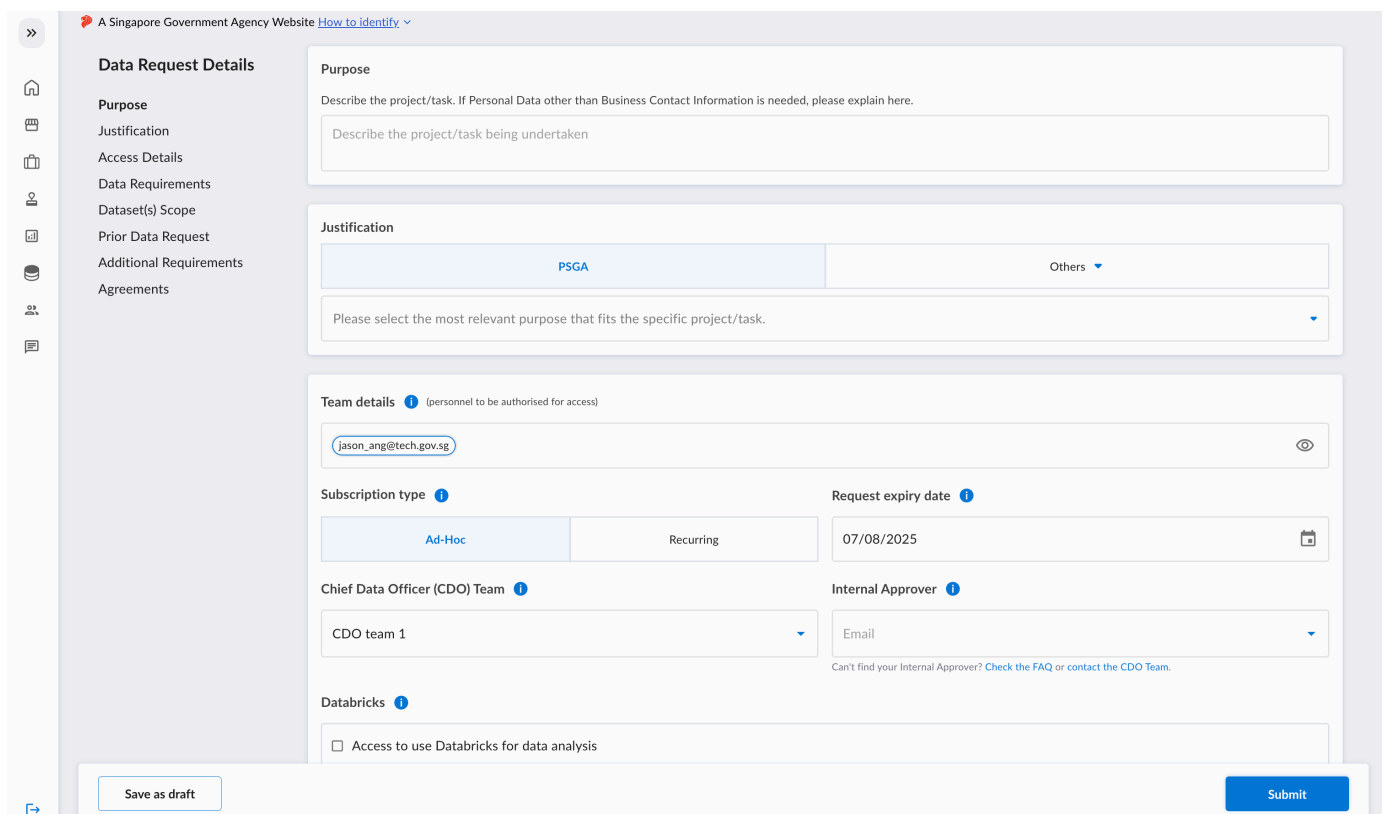

Submit a Data Request

Filling Out the Data Request Form

NOTE

Before proceeding, make sure you have added all the datasets and data products you need to your cart. See [Find & Discover Data](#) for instructions on how to browse and add items to your cart.

After finalizing your cart, the next step is to complete the Data Request (DR) Form with the required details

The screenshot displays the 'Data Request Details' form. On the left is a sidebar with navigation links: Purpose, Justification, Access Details, Data Requirements, Dataset(s) Scope, Prior Data Request, Additional Requirements, and Agreements. The main form area contains several sections: 'Purpose' with a text input field; 'Justification' with a dropdown menu currently set to 'PSGA'; 'Team details' with an email input field containing 'jason_ang@tech.gov.sg'; 'Subscription type' with a dropdown set to 'Ad-Hoc'; 'Request expiry date' with a date input set to '07/08/2025'; 'Chief Data Officer (CDO) Team' with a dropdown set to 'CDO team 1'; 'Internal Approver' with an email input field; and 'Databricks' with a checkbox for 'Access to use Databricks for data analysis'. At the bottom, there are 'Save as draft' and 'Submit' buttons.

Key Sections of the DR Form

1. Purpose

Describe the project or task requiring the dataset.

If Personal Data other than Business Contact Information is needed, clarify its intended use.

- Personal Data refers to data, whether true or not, about an individual who can be identified:
 - i. from that data, or
 - ii. from that data and other information to which the Agency has or is likely to have access.
- Business Contact Information refers to an individual's name, position name or title, business telephone number, business address, business electronic mail address or business fax number and any other similar information about the individual, not provided by the individual solely for his personal purposes.

2. Justification

Select a justification that aligns with your request:

- If [PSGA Data Sharing Direction](#) is selected, please select the most relevant purpose that fits your project/task.
 - The Public Sector (Governance) Act (PSGA) 2018 governs data sharing between public agencies in Singapore. A PSGA Data Sharing Direction authorises agencies to share data with one another for specified public purposes.
- If [Consent](#) is required under [Data Access and Distribution](#) clause 1.2d, please provide documentation of the consent obtained from the relevant data subjects.
 - Data Subject refers to the individual or entity to which the data relates.
- If [Consent Exclusions](#) is selected, please list the relevant exclusion from [Annex A or Part I of Annex B](#).
 - Data requestor is to ensure that the use and disclosure of personal data complies with all applicable legal obligations and [Data Protection \(Additional Requirements for the Protection of Personal Data\)](#) clause 2.1/S1.
- If [Public Interest](#) is selected, please explain how your data request serves the public interest.

3. Team Details

List the email addresses (@agency.gov.sg) of your team members who require access to the dataset per the DR. After the DR has been approved, these team members can access the platform using the services related to the DR.

NOTE

Please note that the email domain suffix should be (.gov.sg). All other email suffixes will be rejected, with the exception of `A*STAR HQ` and `DSTA`.

4. Subscription Type

There are 2 subscription types to choose from.

- **Ad-Hoc:** Request for a fixed date range of a dataset. You will only receive data within the specified time range in the data request.
 - *Example: Request electricity consumption data from January 2024 to December 2024. You will receive only data within that period.*
- **Recurring:** Request for ongoing and recurring updates of a dataset. You will continue to receive new data as it becomes available until the data request expires.
 - *Example: Request monthly water consumption data on an ongoing basis. You will receive updates each month until the data request expires.*

NOTE

Please note that you will not be able to change the subscription type once the DR is approved. Any changes to the subscription type will require a new DR to be submitted.

Users can also opt for [Databricks access](#) in this section.

5. Request Expiry Date

Specify the expiry date for your data request. It should be a minimum period of 1 month to buffer to approval process and provisioning.

You will not be able to access the data request once it expires.

NOTE

- **Ad-Hoc requests:** Expiry date is mandatory.
- **Recurring requests:** Expiry date is optional.

6. CDO Team

Select the CDO Team that should have oversight of your data request. The CDO Team will be able to view the data request, but the data request will not be routed to the CDO Team for approval.

7. Internal Approver

Select your internal approver (IA) from the dropdown list. The IA will be able to make the necessary changes to DR ownership, approve or reject the DR, and manage team access changes.

NOTE

The options in this IA field are dynamically populated based on the CDO Team selected in Step 6. Please ensure that the proper CDO Team is selected before selecting your IA. If you do not see your IA in the list, please contact your CDO Team to add them.

8. Datasets Requirement Summary Table

In this table, you have the choice to edit your dataset and data product selections.

Click on the 'arrow' icon to expand and view the selection details.

Will the results or data be provided to any other agency or Non-Government Entity (NGE) / 3rd Party (3P)?

You have to select all required datasets in order to select the data product again.

9. Datasets Scope

Use filters to refine the datasets. While this is optional, we strongly recommend defining filters. This helps protect your project by preventing unnecessary exposure to more data than required.

If the scopes are not defined properly, tenant admins may prompt you to redefine or correct it.

You can define the following scopes in your data request:

String filter Geospatial filter

An example of a string filter is to filter by postal code. You can add them like so:

The screenshot shows the 'Dataset(s) scope' configuration interface. At the top, there's a section 'Details of scope' with a text input 'Filter by postal code'. Below this, the 'Identifier Type(s)' is set to 'Postal Code'. The 'Rule' is 'Is one of'. The 'Identifier(s)' field contains 'Postal Code'. Below this, the 'Added identifier group(s)' field shows two groups: '123456' and '654321'. A red arrow points to the 'Identifier(s)' field with the text 'Type your postal code here'. Another red arrow points to the 'Add' button with the text 'When you are done, click "Add"'. The 'Add' button is highlighted. There are also links for 'Switch to import', 'Clear all', and 'Export'.

If you have many postal codes, you can switch to import mode by clicking "Switch to import":

The screenshot shows the 'Dataset(s) scope' configuration interface in import mode. The 'Identifier Type(s)' is set to 'Postal Code'. The 'Rule' is 'Is one of'. The 'Identifier(s)' field is empty. The 'Added identifier group(s)' field shows 'No groups added'. A red box highlights the 'Switch to import' button. There is also an 'Add' button. The 'Add' button is highlighted. There are also links for '+ Add conditions', 'Clear all', and 'Export'.

In import mode, you have to upload a CSV file containing the headers defined in the sample. To download the sample, click on the "Download sample":

Dataset(s) scope ⓘ (optional)

+ Add conditions

Applicable for which dataset(s)

☒ Water Consumption

10. Prior Request (Optional)

You can specify prior related requests made which may help expedite the request. Some examples of prior requests include bilateral agreements with SSOTs or previous Ad-Hoc requests with a Trusted Center. You can also choose to upload any supporting documents.

11. Additional Requirements (Optional)

You can specify specific use cases here. Tenant Admins may follow up with you for further discussion to fulfill the data requirements. Similar to the prior request field, supporting documents can also be uploaded to the button associated with the additional requirement field.

12. Datafields Hashing (Optional)

TIP

Learn more about how DataHive tokenizes identifiable data [here](#).

The datafields hashing feature in DataHive enables you to upload your own datasets as part of a data request. DataHive will hash your datasets in the same way as the de-identified datasets provisioned from DataHive.

NOTE

This feature is only applicable when your data request includes de-identified data.

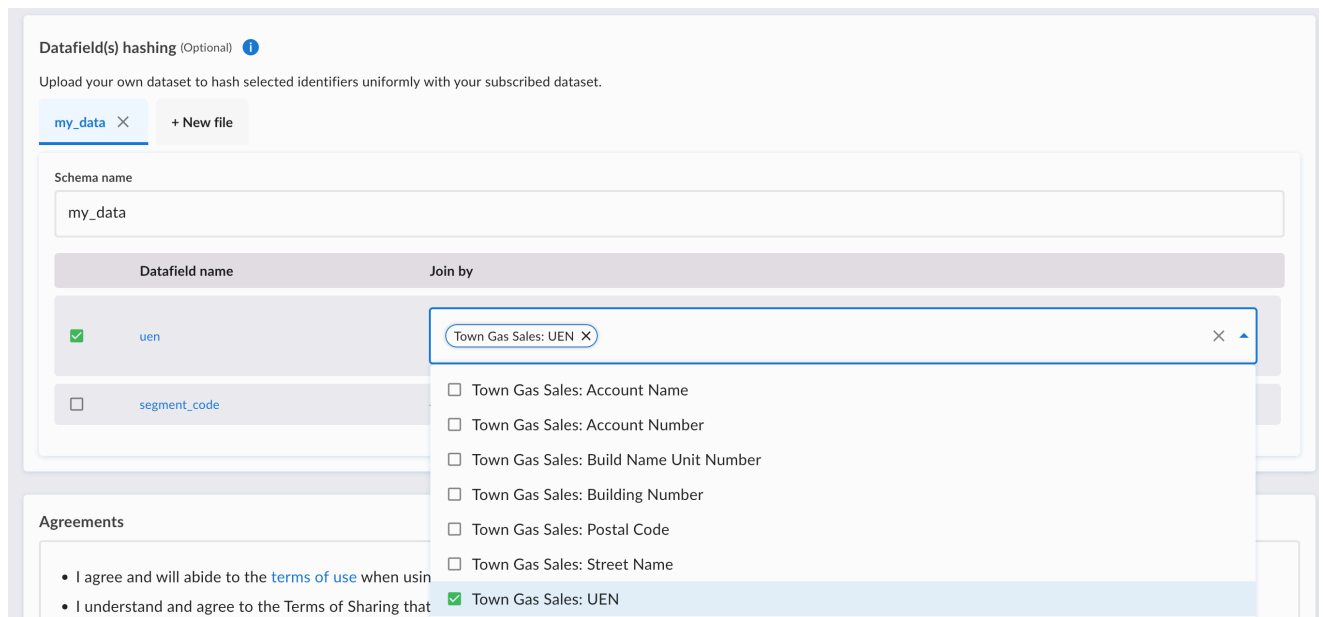

Ensure that you have your dataset schema ready in CSV format. Once your schema is defined and your data request is fulfilled, it cannot be changed - additional files uploaded later must conform to this defined schema.

WARNING

Unauthorized re-identification of anonymised information is an offense under Section 8 of the Public Sector (Governance) Act 2018. ([Learn more](#))

How to Use This Feature:

1. Upload your CSV file (file size limit of 50MB when submitting; once approved, you can upload more data up to 2GB per file with the same schema).
2. The platform will automatically validate and populate the table with the schema of your uploaded file. This ensures that future uploads align with the pre-defined schema.
3. Select the datasets and columns you wish to fuse with your uploaded data.

Datafield(s) hashing (Optional) ⓘ

Upload your own dataset to hash selected identifiers uniformly with your subscribed dataset.

[my_data](#) × [+ New file](#)

Schema name

my_data

Datafield name	Join by
☒ uen	Town Gas Sales: UEN ×
☐ segment_code	☐ Town Gas Sales: Account Name ☐ Town Gas Sales: Account Number ☐ Town Gas Sales: Build Name Unit Number ☐ Town Gas Sales: Building Number ☐ Town Gas Sales: Postal Code ☐ Town Gas Sales: Street Name ☒ Town Gas Sales: UEN

4. Once your DR is fulfilled, you will be able to use to access the hashing feature.

CONGRATS

Once the form is complete, click on the [Submit](#) button.

You have just submitted your first DR!
