

User Roles

DataHive users are tied to roles that allow them to perform different key actions according to their specific responsibilities. These actions are detailed below from the perspective of a Data Providing Agency (DPA) or a Data Consuming Agency (DCA). A DataHive Tenant is normally a DPA who publishes and shares data directly on DataHive (e.g. a Trusted Centre operates as a Tenant managing Core Data, or an Agency might self-publishes and distributes their own dataset).

Role Overview

Role	Description	Key Actions	DPA	DCA
All Users	Login and request for data.	Search and discover datasets		
		Submit and amend data requests		
		Access datasets		
		Create visualizations		
Chief Data Officer (CDO)	Oversees data governance for an agency.	Add / remove CDO Team members		
		Change CDO Team member role assignments		
		Oversee outgoing agency data requests		
		Create / update tenants		

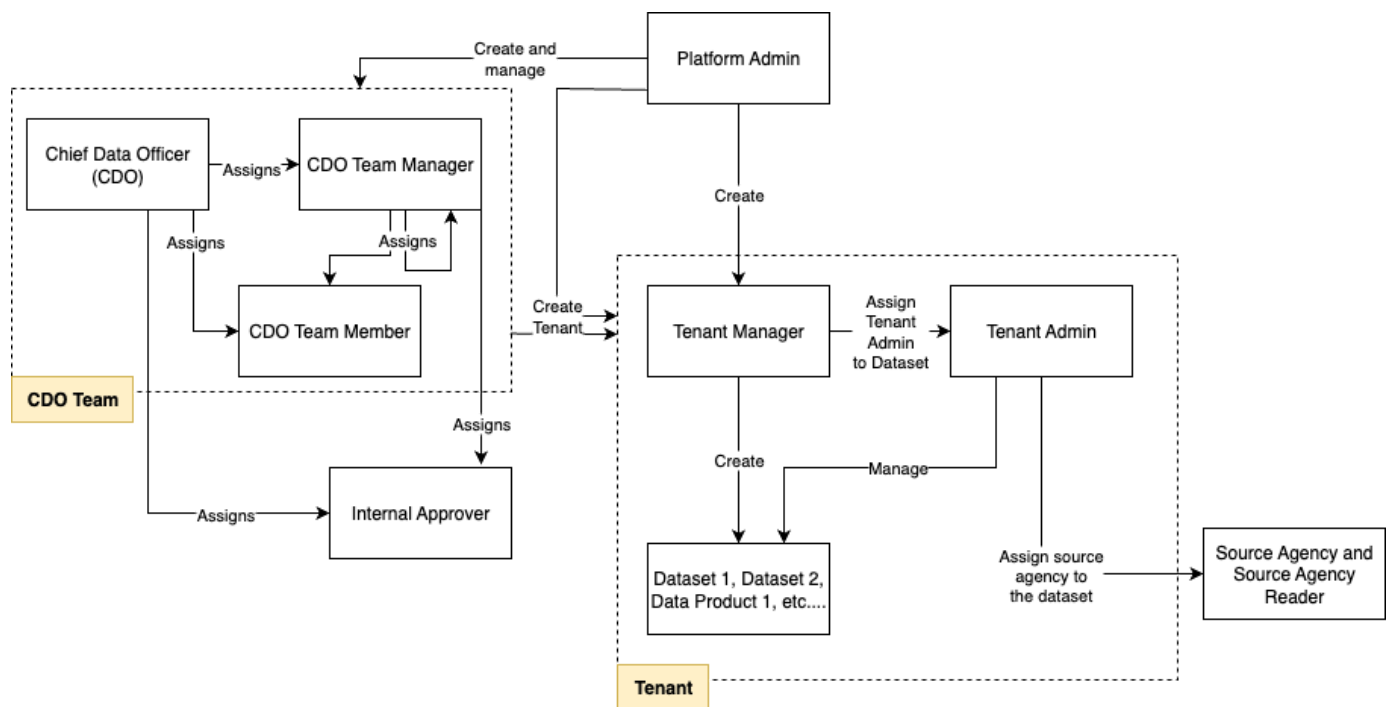

Role	Description	Key Actions	DPA	DCA
		Add / remove Internal Approver(s) for agency *		☒
		Re-assign Internal Approver of outgoing agency data requests		☒
CDO Team Manager	Assists with data governance for an agency.	Add / remove CDO Team members	☒	☒
		Assign / unassign CDO Team member roles	☒	☒
		Oversee outgoing agency data requests		☒
		Create / update tenants	☒	
		Add / remove Internal Approver(s) for agency		☒
		Re-assign Internal Approver of outgoing agency data requests		☒
CDO Team Member	Assists with data governance for an agency.	Oversee outgoing agency data requests		☒
		Create / update tenants	☒	
Internal Approver	Approves or rejects outgoing data requests and access.	Approve/reject outgoing data requests		☒
		Edit data request team access		☒

Role	Description	Key Actions	DPA	DCA
		Change data request owner		☒
		Accept / reject Internal Approver re-assignment requests		☒
Tenant Manager	Oversees tenant-wide activities and users in the tenant.	Onboard datasets	☒	
		Assign Tenant Admins to datasets	☒	
		Add / remove tenant members	☒	
		Change tenant member role assignments	☒	
		Approve or reject fast-tracked datafields of incoming data requests	☒	
		Approve or reject dataset un-publishing	☒	
		Approve or reject dataset deletion	☒	
		Restore deleted datasets	☒	
		Approve or reject tenant connections	☒	
Tenant Admin	Manages datasets and verify incoming data requests.	Upload datasets	☒	

Role	Description	Key Actions	DPA	DCA
		Publish dataset	✓	
		Verify and fulfil incoming data requests	✓	
		Un-publish dataset (subject to approval)	✓	
		Delete datasets (subject to approval)	✓	
		Assign datasets to service principal accounts	✓	
Source Agency (with approval rights)	A Source Agency (SSOT) with approval rights. Reviews and approves non-fast-tracked datafields for their own dataset(s).	Approve or reject non-fast-tracked datafields of incoming data requests (own dataset(s) only)	✓	
Platform Admin	Manages platform-wide roles and tenants.	Manage tenants and CDO lists		
		Create and administer platform users		
		Purge datasets		

Relationship between User Roles

The user roles and their relationships are illustrated in the diagram below:

Note: The Tenant Manager and Tenant Admin roles must be assigned to separate individuals.

Role Permissions Matrix

By default, **all users** will be able to

- Submit Data Requests
- Access Datasets (upon DR fulfilment)
- Amend Data Requests

The following tables summarise the role permissions for specific functions:

Data Request Approval

Feature	Internal Approver	Tenant Admin	Tenant Manager	Source Agency (SSOT) (with approval rights)
Verify data request		✓		

Feature	Internal Approver	Tenant Admin	Tenant Manager	Source Agency (SSOT) (with approval rights)
Approve/Reject data requests	✓			
Approve/Reject data requests with fast-tracked fields			✓	
Approve/Reject data requests with non-fast-tracked fields (scoped to their own dataset(s))				✓

Dataset Management

Feature	Tenant Admin	Tenant Manager
Onboard dataset		✓
Upload dataset files	✓	
Share dataset via Snowflake Private Listing	✓	
Edit and Publish dataset metadata	✓	
Assign Tenant Admins		✓
Manage Tenant Users		✓
Create/fulfill dataset changelog	✓	
Un-publish datasets	✓	
Approve/reject dataset un-publishing		✓

Feature	Tenant Admin	Tenant Manager
Delete datasets		
Approve/reject dataset deletion		
Restore datasets		

CDO Team Management

Feature	Chief Data Officer (CDO)	CDO Team Manager	CDO Team Member
Manage CDO Team			
Create/Manage Tenants			
Manage Internal Approver(s) for Agency			
Re-assign Internal Approver of Data Request(s) for Agency
