

Welcome

This is the guide for [DataHive](#) users.

▼ What is DataHive?

- DataHive is the Whole-of-Government platform for discovering and requesting government datasets.
- The platform supports data classified up till Confidential Cloud-Eligible, Sensitive Normal (CCE-SN).
- Visit our [site](#) to get started

0:00 / 1:08

Getting Started

Not sure how to begin? Use the resources below:

New Users

- [Sign in directly](#) - DataHive uses WOG Entra ID to authenticate users.
- [Browse available data](#) - Begin your journey by looking at the available datasets.
- [Use the DataHive Assistant](#) - Let the DataHive Assistant help you discover datasets or find answers about DataHive features through a natural language chat.
- [Create data request](#) - Create a data request to get the datasets that you want.

Returning Users

- [Track your data requests](#) - Check the status of your data request
- [Manage access to your data requests](#)

System Requirements

Ensure you have the following to access DataHive:

-  Device: GSIB or COMET device
-  Valid government email account: eg. [example_user@agency.gov.sg](#)
-  Supported Browsers: Microsoft Edge (Chromium) or Google Chrome
-  Two-Factor Authentication: Microsoft Authenticator on your mobile device
